Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 37-40, drawn to a piezo actuated clutch, classified in class 192, subclass 90.
- II. Claim 32-36, drawn to a gear selectively connected to a shaft, by a piezo element, classified in class 192, subclass 84.9.
- III. Claim 17-27, drawn to a fluid actuator controlled by a piezo control valve and controlling a lever, classified in class 91, subclass 51.
- IV. Claim 2-16, 28-31, 41-47, drawn to a valve controlled by a piezo element, classified in class 251, subclass 129.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated to each other or to inventions III or IV. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the inventions I and II are not capable of use together with each other or the other inventions and has different modes of operation, different functions, and different effects from each other and from the other inventions.

Inventions III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claims 17-25 are evidence claims that the combination does not need the particulars of the subcombination. The subcombination has separate utility such as controlling flow to a rotary actuator.

Claim 1 is a linking claim.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention IV: species A as fig 1, species B as fig 2, species C as fig 3 or 8, species D as fig 7, species E as fig 11, and species F as fig 19.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits, if invention IV is elected to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 8, 9 and 28 are generic to all species; claims 2 and 3 are generic to species A, D and E; claim 4 is generic species B and C; claims 10, 12 and 16 are generic to species C, E and F; claim 29 is generic species A and F; and claim 29 is generic to species A and F.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3745

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
